764 Horizon Drive
Grand Junction, CO 81501

File ACT 1647/1017
IN REPLY REFER TO:

RECEIVED
DEC 27 1984

DIVISION OF
OIL, GAS & MINING
December 12, 1984

Memorandum

To: Oil Shale Project Manager
From: Don Johnson, Chemist
Subject: Tract U-a/U-b; General Inspection Included Mine Development

Personnel Present: Bob Hobbs - WRSOC Don Johnson - BLM

Activities:

Inspection on December 12, 1984.

Mine development activities included work on the mine test room and the second access drift. Short, temporary roof bolts were being installed in the area of the test room where the large expanse of unsupported roof will be. Upon completion of the test room and access drifts, these roof bolts will be removed. Surface cleanup operations are nearly complete including removal of the concrete batch plant. Topsoil-like material was placed in this disturbed area, followed by reseeding. The landfill for solid waste will need additional work after cleanup operations are complete.

The tract continues to be maintained in a neat and orderly fashion.

Don Johnson
